

YES for A Healthy Learning Environment

Clean air, clean water, and a healthy environment are as important to education as are a good curriculum and good teaching.

Existing Standards were designed for minimum protection of adults in the workplace not for the vulnerable bodies of school children. Safe and healthy schools don't just "happen". They need CASLE and you.

OUR MISSION

With solid information, respect, and persistence as our primary tools we can help provide healthy school buildings and environmentally healthy products and practices in schools.

Please donate to CASLE so this important work can continue. www.casle.ca

CASLE has had **20 very successful years** improving school indoor environments. We coordinate Canada's Healthy Schools Day each April on the Monday of CEFPI's School Building Week.

Canadians for A Safe Learning Environment

CASLE is a registered charity with a network of volunteers and affiliates across Canada and the USA.
